

Year in Industry Software Developer

Full Time/Year in Industry

Are you doing a Computer Science Degree and are looking for a company that will support you with a Year in Industry placement?

We are looking for a Year in Industry Computer science student to join our Digital team, based at our Runcorn site with a willingness to occasionally travel and carry out duties in our other sites throughout the UK. This is a very exciting opportunity for an enthusiastic applicant to work with our development team, who are continuously developing their skillset to meet the demands of a growing business. This role will be developmental, with possible future opportunities within our business once graduated.

The ideal candidate will have previous experience of software development either through work or education. Good communication, problem solving, and organisational skills would be a key advantage for this role.

What you'll be doing...

Reporting to the Group Digital Lead, you will be responsible for providing support to the Group whilst developing your skill set, including:

- Ongoing development of internal tools
- Manage, maintain and develop externally facing websites
- API modification and development
- Troubleshoot user and customer issues
- Creation of system architecture documentation

Your background...

Must have...

- Previous experience of software development either through work or education
- Excellent communications skills
- Attention to detail

Nice to have...

- .NET Core
- Microsoft SQL Server
- Azure Cloud and Cloud Applications
- Agile Product Development

What we can offer you...

- Salary: £21 - £23k (depending on age and experience)
- Hybrid and flexible working including hours of work and location (primarily based out of our Runcorn office)
- Varied working environment with multiple office locations (Runcorn, Leeds, Huddersfield, Leicester & Liverpool)

A bit about us...

2M Group of Companies includes a portfolio of branded companies of chemical distribution and related chemical services of samples management, storage and blending. 2M Holdings is a wholly owned private company, head quartered in the UK and with an international presence in: Benelux, Brazil, China, France, Germany, Nordics and Poland. 2M distribute the building blocks of hundreds of everyday consumables including cosmetics, beauty products, pharmaceuticals and cleaning solutions.

Being a relatively old-fashioned industry, 2M are bucking the trend when it comes to digital acceptance and development. With this comes a requirement to bring a year in industry developer in house, who can aid in the creation, development and maintenance of our digital stack.

Reporting to the Group Digital Lead, you will be asked to truly understand the software stack and develop it using good practice with security of data always at the forefront.
